AOC

USB-C
connectivity

Single cable
for multiple purposes

Transform the way you work with USB-C:
Fast, Simple & Clutter Free

Unclutter your workstation and enjoy increased flexibility with AOC's USB-C monitors. With **USB-C functionality**, you have all the possibilities with one single cable.

Delivering power, data and display signal, you can enjoy the simplest yet **most powerful connectivity for any modern device**.

USB-C gets
you ready
with just one cable

Our new
way of working

An essential tool for our
new way of working

The **USB-C cable** is able to do all the things any other cable could not: it **charges your laptop** with **up to 60W**, reproduces **4K UHD** with a refresh rate of **60Hz** and can transmit up to **10 Gbps** thanks to the **USB 3.1** or **USB 3.2** protocol. Due to its success, almost all **modern devices now feature USB-C**, and are planned to do so in the future.

This means you **won't have to worry** about **replacing your cables** all the time. Whether you are a pro-user, at home or in the office, or even on the go the USB-C upgrade is something you wouldn't want to miss.

USB-C Docking for
supercharged productivity

For office and corporate environments, AOC's **USB-C Docking monitors** from the P3 range below **offer an enhanced clutter-free solution** through a combination of **USB-C, RJ45 & DP-out technology**, removing the need for any bulky external docking standalones whilst **guaranteeing high connectivity**.

Daisy Chain
## Productivity in full comfort

Daisy Chain
through **DisplayPort**

+

Ethernet
through **RJ45**

Daisy chaining
with DisplayPort

Using AOC's USB-C docking technology you can create a **multi-monitor set up easily and almost wirelessly**, through daisy chaining. Daisy chaining is the process of **connecting more than one monitor to another**, then **to one single computer**. The connection is made by a **DisplayPort cable**, as opposed to connecting each single monitor to the computer or laptop in use. The result is that **multiple high-resolution displays** can connect **with just one cable to your PC**, **enhancing productivity while reducing desk clutter**.
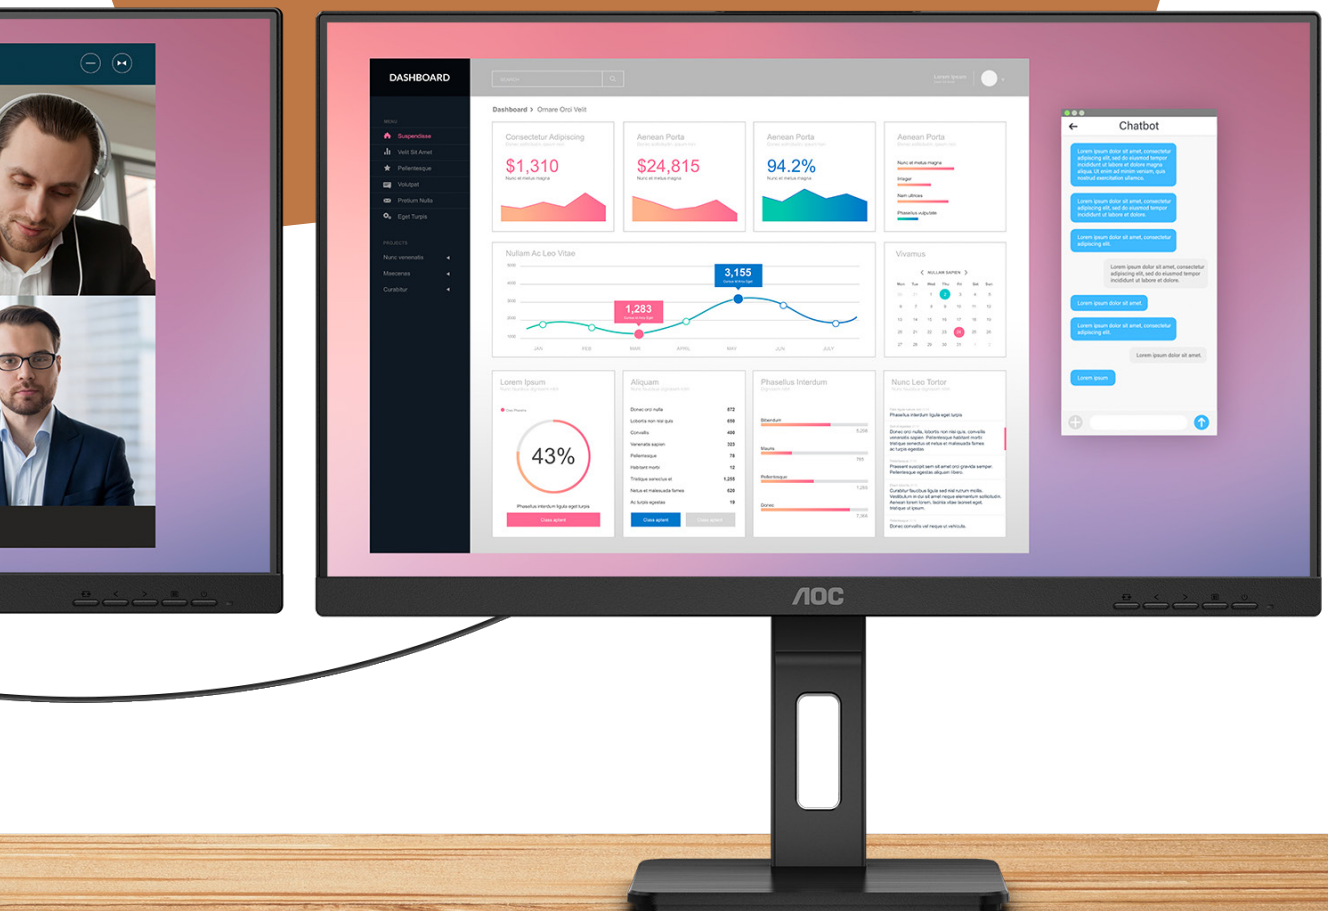

Graphic Pro Line

U3 Graphic Pro Monitor for creatives

USB Type-C™
one cable is all you need

The **USB-C connection** provides **DisplayPort ALT Mode** for transferring **high-resolution video** signals from a notebook to the monitor while simultaneously charging the notebook's battery from the monitor with **USB power delivery**. Additionally, **USB 3.2 ensures lightning-fast data transmission**, so even transferring a **4K movie** can be done in **less than one minute.**
